Barn Owl		Bewick's Wren	
Western Screech-Owl		Cactus Wren	
Great Horned Owl		Blue-gray Gnatcatcher	
Burrowing Owl		California Gnatcatcher	

2016 CASU Tally Sheet

SL Birds: For each bird, specify location so others can find the spot. Also describe the habitat. For birds in flight, give the time of day and direction of travel.

Observers and Counters: Please provide the following information on time & miles

In the table below, list each party and break out their time & miles

Start Time and End Time: List when each party started and ended

Party-hours and miles: This is very important because much research is based on these statistics. A Party is any group of people birding together, or even one person birding alone. If the same group is together all morning, eats lunch, then stays together all afternoon, that's one party. But if the same people are together all morning, then after lunch they split up into 2 groups, they become two new parties. That group had a total of 3 parties that day (one in the morning and two in the afternoon). It does NOT matter how many people are in each party. All of the CBC statistics are based on "parties", not "people". Base the decision of "how many parties on the makeup of each group. When people shift around, it becomes a different party.

AREA Leader: transfer this information to your Area Leader's Report Form.

	Start time	End time	Night hours	Daytime Hours	Daylight hours only		
					Hours	Hours	Hours
					by Foot	by Car	by Boat
Party 1							
Party 2							
Party 3							
Party 4							

"Night" is before 6:30 AM or after 5:30 PM. Keep Nighttime activities, such as Owling & Railing, separate from daytime activities.
