

Bird Phenophases

NESTED

Active individuals: **

One or more individuals are seen moving about or at rest

Feeding:

One or more individuals are seen feeding. If possible, record the species or substance being eaten or describe it in the “comments” field.

Fruit/seed consumption:

One or more individuals are seen eating the fleshy fruits, seeds, or cones of a plant. If possible, record the name of the plant or describe it in the “comments” field.

Insect consumption:

One or more individuals are seen eating insects. If possible, record the name of the insect or describe it in the “comments” field.

Flower visitation:

One or more individuals are seen visiting flowers or flying from flower to flower. If possible, record the name of the plant or describe it in the comments.

Bird Phenophases

Calls or song:

One or more individuals are hearing calling or singing.

Singing males:

One or more singing males are heard. Singing refers to stereotypical, simple or elaborate vocalizations used as part of a territorial proclamation or defense or mate attraction. It does not include relatively simple calls used for other forms of communication.

Mating:

A male and female are seen coupled in a mating position, usually with the male on top of the female.

Nest building:

One or more adults are seen constructing a nest or carrying nesting material.

Dead individuals:

One or more dead individuals are seen, including those found on roads.

Abundance: number of individuals seen in that phenophase
