

- Starting point and end point are circled in Red.
- Route is outlined in Yellow.
- Each Pink circle indicates the location of a timed "stop" along the route. However, data should be collected along the route within the 5 minutes between these timed sites.
- Sites are listed in the order in which they should be surveyed.
- Once these 6 sites are completed. Time, and therefore data gathering, should be halted and group should proceed to Site 7 to complete the survey. Additional data should be recorded from that location only; which is outlined on map for Site 7. This last stop is a 15 minute "stop".
