

## **VOLUNTEERS NEEDED**

### **Orange County Nesting Raptor Surveys**

**February - June 2023**

**Sites throughout Orange County. Flexible volunteer assignments.  
Volunteer with a friend!**

Volunteers will search for active raptor nests in assigned locations (parks and open spaces) and then monitor nests periodically through the spring breeding season to document nest success. This is part of an ongoing research project to better understand reproduction success of local raptors, with special interest in nesting attempts by Red-tailed Hawks, Red-shouldered Hawks, Cooper's Hawks, Great Horned Owls, and Barn Owls—and any observations of White-tailed Kites.
